Sky-Tec Flyweight™ Starters Aircraft Fit Guide

Sky-Tec Flyweight™ Starters
350 Howard Clemmons Rd
Granbury, TX 76048
800-476-7896
www.skytecair.com
richc@skytecair.com

Caution:

Please Read Before Using This Guide

1. This document is intended as a guide for fitting most aircraft by type. However, due to variances between aircraft due to manufacturing changes, modifications, cumulative years of maintenance and/or conversion, ***it is nearly impossible to definitively recommend the correct starter for any particular aircraft based on make/model alone.*** So please only use this document *AS A GUIDE ONLY*. When in doubt, call the Sky-Tec factory for confirmation. Installation of the wrong starter will void the factory warranty. Sky-Tec will not warrant starter wear or damage on starters that were installed incorrectly (including wrong ring gear teeth or wrong voltage).
2. There may still be a starter to fit an aircraft whose entry shows “no starter available”. Many older aircraft have been converted and upgraded. Ask your customer to confirm the engine make/model before determining a Sky-Tec is not applicable.
3. Please note the use of ring gear tooth count (on Lycoming engines) and aircraft voltage in the model numbers of all Sky-Tec starters. If your aircraft ring gear teeth and/or voltage do not match the numbers in the model recommended for your aircraft, **DO NOT ORDER THE STARTER** without first contacting Sky-Tec or adjusting your model number accordingly.
4. Piper singles with air conditioning can make fitting some models of starter very difficult. Call the factory to discuss your installation before purchasing any starter.
5. Please do not assume ring gear tooth count (on Lycoming engines). Through the years, mechanics have been known to replace ring gears with whatever model they had laying around their shops at the time the work was performed. Therefore it is imperative that the installer **CONFIRM RING GEAR TOOTH COUNTS ON ALL LYCOMING INSTALLATIONS.**
6. **IF YOU ARE UNSURE WHETHER THE STARTER YOU RECEIVE IS CORRECT, PLEASE DO NOT MOUNT IT.** Call the factory first. Mounting the starter will preclude you from returning the starter to Sky-Tec as new/unused. Mounting the starter places ‘bite marks’ around the mounting holes and will have to be treated as *used* starters (no new exchange will be permitted).
7. Never use a PM or LS (permanent magnet) starter on a helicopter. Sky-Tec **ONLY** recommends HT or HTInline starters (NL models) for use on helicopters.
8. And finally, this list is only as comprehensive as we could attempt to make it. We realize there are omissions and variances. We’ve done our best to include the majority of general aviation aircraft models. If you cannot find what you are looking for (or what you are looking for is not where you’d expect it), we encourage you to speak with the factory to find the best starter for your particular application.

Please refer to Caution section (page 2) before recommending/ordering any starter

Notes

1. Sky-Tec Starter is the original equipment starter
2. Modification of oil cooler bracket may be required
3. If oil cooler is in front of engine, choose PM model
4. BCE-6 (battery cable extension) may be required
5. Baffle modification required
6. Cowl bumper bracket modification required
7. If using RV-7 "Snorkel" induction, may have to use 149-NL starter (or alternatively, 149-12PM Flyweight™)

Please refer to Caution section (page 2) before recommending/ordering any starter
